

BATTERY ENERGY STORAGE SYSTEM (BESS) CONTAINERS

Introducing our fire-resistant Battery Energy Storage containers - the ultimate solution for secure and efficient energy storage.

Our BESS units offer fire-resistant battery storage solutions ranging from 10' to 40'. The units are manufactured to meet your specific requirements at our facility in Knowsley. With over 55 years experience in design and manufacturing, you can count on us for a timely delivery and exceptional quality.

CUSTOMISATION

Choose from 10ft, 20ft, or 40ft container options - our advanced BESS seamlessly fits your setup. Whether standard or unique, our expertise ensures a perfect alignment with your needs, enhancing efficiency and performance.

SECURE

Safety is our priority. Units include fire-resistant lining, Emergency Lighting and Fire Alarm for a reliable and secure energy storage solution.

TURNAROUND

Prompt delivery of your customised energy storage system with unwavering quality. Our committed team guarantees a dependable solution, empowering you to embrace the future of energy storage confidently.

Our BESS container encompasses all essential components. Divided into two sections, it features a thoughtfully designed layout. One side houses the battery system, air conditioner, and necessary controls, while the other side accommodates the control system, electrics, large louvres, and a fire-resistant personnel door, providing safe access and an added layer of safety.
